

## Making the Outer Cube

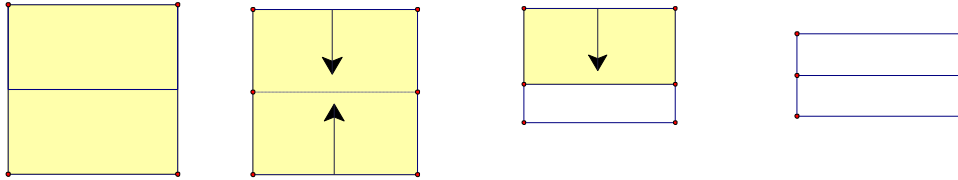

1. Start with a square.

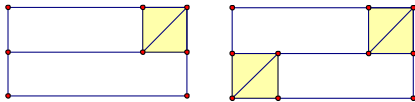

2. Fold the square in half, color in.

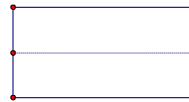

3. Open up the paper, color up and fold the two edges to the fold line.

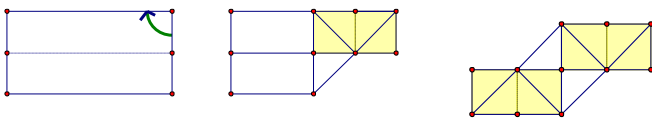

4. Fold upper right corner.  
Rotate 180 degrees and repeat.

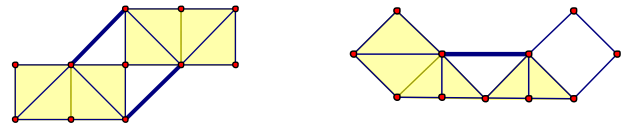

5. Flip the paper over so the open edges are against the table, and the fold line is visible.

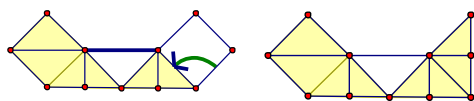

6. Map the right edge to the top edge through the upper right vertex.  
Rotate 180 degrees and repeat.

7. Flip over and fold highlighted sides together color out.

8. Fold edge as shown.

9. Flip entire piece over center line and repeat previous instructions.
